

SERVI DORYL

CHEESE MOULDS EXPERT

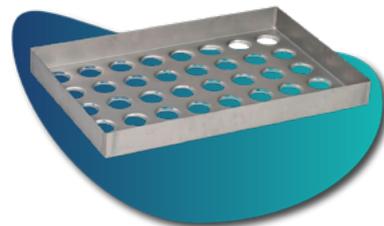

CURD DISTRIBUTORS

ALUMINIUM

PLASTIC

STAINLESS STEEL

Servi Doryl has been manufacturing and designing a wide range of curd distributors since 1972 which **can be adapted to any type of product**: square, rectangular, round, oval, triangular, etc.

The design is **fully adjusted to the dimensions and specificities** of your production line. The curd distributors can be used manually or on mechanised lines.

- From **1 to 5 trays**
- Possibility of hanging up several curd distributors in a train
- Manual or automatic

- Boilermaking
- Injected
- Thermoformed

- Polyethylene ; polypropylene ; ABS ; stainless steel ; aluminium

BENEFITS :

- Wide range of sizes
- Opening adjusted to moulds and productions
- Different materials and colours
- Better curd distribution of curds during moulding
- Improved yields and reduced curd losses
- Support adapted for vertical storage
- Less risk of deformation
- Recyclable materials, controlled recycling circuits
- Possibility to take back the distributor at the end of its life
- Reduction of the environmental footprint
